*Pre-College Virtual Program includes:*

**Live Sessions:** online lectures and discussions led by an expert in the field. These sessions focus on content knowledge & may include guest speakers.

**Guided activity periods:** activity periods, online activities and projects that will focus on skill development and provide peer-to-peer interaction, often led by the co-instructor, an experienced high school teacher.

**Independent study modules:** self-paced, guided assignments that practice skill development and higher-level thinking. These will be available asynchronously on Canvas for students to complete in their own time, prior to the next day's class session. These modules will help students prepare for their final projects. Instructors and Academic Lounge staff will be available during the independent study module time to answer questions and offer extra help.

**Daily meetings and community events** will be available for students in all courses, and may also include guest speakers (Master Class, college events).

*All live academic sessions and activity periods will be recorded and posted on Canvas for students who cannot participate synchronously.*

**Sotheby's**  
INSTITUTE OF ART

*All times are in Eastern Standard Time*
